\*\**Grw/Gs* is how some experts conceptualize the broad ability associated with the actual task; cross-loading is not uncommon due to the nature of many cognitive tasks.

The Cognitive Proficiency Index (CPI) can be thought of as *Gwm/Gs*.

Refer to *Essentials of Cross-Battery Assessment*, Third Edition (Flanagan, Ortiz, & Alfonso, 2013) for more information about using a CHC approach.

The information contained in this report is provided for examiners who use the CHC theory to guide their approach to assessment. These CHC test classifications do not necessarily reflect the views of Pearson, the WISC-V author/development team, or the KTEA-3 authors.
