Q-interactive = Automatic Scoring
No Additional Fee

Q-Global Scoring and Reporting
(paper and pencil)
Per use and unlimited use
Options available
Hand-score (paper and pencil)

What is Q-interactive?

Changing Times...

Wechsler-Bellevue: 1939
Q-interactive: Today
Q-interactive
Digital system for individually-administered tests consisting of two primary components

**CENTRAL:**
Secure, browser-based function for generating client profiles, building test batteries, creating assessment sessions, and sharing results.

**ASSESS:**
Application that lets an examiner administer a test via two tablets connected by Bluetooth.

Add Subtests When Needed

Reconciling Scores – “To do” List
Reviewing Assessment Results

- See scores at a variety of levels
  - Subtests
  - Composite
  - Comparison
  - Additional information
How is data secured?

- Security compliance with the standards established in the HIPAA and FERPA Security Regulations and in accordance with the HITECH Act applicable to Business Associates.

- All transfers to or from the web application to the tablet are automatically encrypted, using industry best practices.

- Client data is transferred from the tablet, using a secure connection, and stored in an encrypted Pearson database.

- A variety of administrative, physical, and technical safeguards are in place on Q-interactive to protect your personal data.

Current Psychometric Study Findings
Equivalence versus Equating

- Equivalence: Are the raw scores on the two forms the same?
  - Subtests with little change (all except Processing Speed)
  - Paper norms, reliability, and validity applicable to digital results
  - Previously shown on WISC-IV and others
    (Qi technical reports: www.helloq.com/research.html)
- Equating: The raw scores on the two forms are different, but how can the raw scores on one form (digital) be transformed to equal raw scores on a base form (paper)?
  - For Processing Speed subtests
    (Coding, Symbol Search, Cancellation) only
  - Need additional validity evidence beyond paper format
Hardware Requirements

- Two iPads (iPad 2 or newer)
- One stylus (2 best for WISC-V)

Price = No. of Users & Tests + Subtest Usage

Step 1: # of Users & Tests

Ask yourself:

a) How many users need access?

b) How many tests do we need to access?

The more users & tests, the lower the per user cost.

Step 2: Subtest Usage Cost

- Option 1

- Option 2
WISC-V Digital on Q-interactive

- 60-day trial offer available until June 2014
